

DEEP JALGARIYA

Python Developer | AI/ML Engineer | GenAI | Data Analytics

Ahmedabad, Gujarat

+91 78629 08018 | deepjalgariya@gmail.com | linkedin.com/in/deep-jalgariya | github.com/Deep-Jalgariya | [portfolio](#)

PROFESSIONAL SUMMARY

Python Developer focused on backend development, Machine Learning, and Generative AI, with a strong foundation in building practical software applications. Skilled in Python, Django, Django REST Framework, SQL, React.js, Node.js, Scikit-learn, Git, and Docker. Built projects including a Django-based Pharmacy Management System, a React/Node.js Blogging Application, and an AI-powered Document Intelligence Platform using LLaMA-3, FAISS, and RAG. Interested in developing scalable, data-driven applications and applying AI to real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript

Backend Development: Django, Django REST Framework, Node.js, Express.js

Frontend Development: HTML, CSS, Bootstrap, React.js

Databases: MySQL, MongoDB, SQLite, PostgreSQL

Machine Learning & Data Science: Pandas, NumPy, Scikit-learn, TensorFlow, Plotly

AI & Generative AI: LLaMA-3, FAISS, RAG, Semantic Search

Tools & Technologies: Git, GitHub, Docker, Power BI

Domains: Machine Learning, Deep Learning, Data Analysis, Backend Development

PROJECTS

DocIntel AI — AI Document Intelligence Platform

- Developed an AI-powered Document Intelligence Platform using **Python and Django** to analyze PDF and DOCX documents.
- Integrated **LLaMA-3, FAISS, and RAG** to implement document-based question answering and semantic search
- Implemented AI-powered features including **document summarization, quiz generation, flashcards, Named Entity Recognition (NER), keyword extraction, and translation.**
- Implemented **secure user authentication** for controlled access to the platform.

PharmaRootz — Pharmacy Management System

- Developed a **Django-based pharmacy management system** for inventory control, customer management, billing, and sales tracking.
- Implemented pharmacy management workflows using **Python and Django** with a responsive web interface.
- Integrated **AI-powered disease-based medicine recommendations and medicine substitution** features.
- Implemented automated invoice generation to support pharmacy billing operations.

Blogging App — Full-Stack Web Application

- Developed a **full-stack blogging application using React.js and Node.js** for creating, managing, and reading blog content.
- Implemented **JWT-based authentication**, user profile management, rich-text story creation, commenting, and reading-list functionality.
- Built responsive user interfaces with dark/light theme support and skeleton loading.
- Implemented frontend and backend functionality using React.js, Node.js, Express.js, and JavaScript.

EDUCATION

Bachelor of Engineering in Computer Engineering

L. J. Institute of Engineering and Technology · Aug 2023 – Present

CGPA: 9.48 / 10

CERTIFICATIONS

Building Generative AI-Powered Applications with Python

IBM · Jul 2026

Exploratory Data Analysis for Machine Learning

IBM · Jun 2025

DBMS — Master the Fundamentals and Advanced Concepts

Scaler · Jun 2025

Analyze Sentiment with Natural Language API

Google Cloud · May 2025
